## PROFILE

Enthusiastic computer engineering graduate with extensive knowledge in mobile application development. Seeking a challenging junior front-end developer role where I can utilize my passion for mobile app and web development. I am eager to join a dynamic team and continue growing my skills in the field.

## WORK EXPERIENCE

### EETECH Innovation

• 2021

#### Proggrind Training Internship

- Fulfilled team leader role and develop a full stack android application.
- Assist and conduct tutorials to help my team to successfully build their own android application.

### CREOTEC PHILIPPINES INC.

• 2018

#### Quality Assurance

- Tasked with conducting test and validation procedures for the company's product hardware.

## PROJECTS

- **IoT: Automatic Waste Segregation**

Design project that segregates plastic, metal, wet waste & paper, and it allows user to monitor the level of bin in the mobile application.

- **SocialEase**

Mobile application project aimed at replicating the essence of popular social media platforms. SocialEase enables users to create engaging posts and stories, search and view other users and connect with them.

- **QR Library Application**

Mobile application that automates school library time-in and time-out logs by scanning students QR codes.
